

**ANXIETY AND DEPRESSION
CONFERENCE ★ MARCH 28-31 ★ 2019**

ADAA CHICAGO

ANXIETY AND DEPRESSION: FOCUSING RESEARCH ON IMPROVING TREATMENT OUTCOMES

**CUTTING EDGE RESEARCH TO OPTIMIZE TREATMENT SUCCESS
TRANSCENDING CULTURAL, RACIAL AND SOCIOECONOMIC BARRIERS**

Are You a Biological Psychiatry Researcher?

Looking for an opportunity to find your professional home?
A place to expand and develop your research support network?

Here's Why You Should Attend the ADAA Conference:

- Interact with clinicians that see patients with the psychiatric disorders we study
- Formulate hypotheses that are rooted in clinical features of psychiatric disorders
- Develop relevant experimental plans
- Better integrate results in model systems into new conceptual models for disease mechanisms
- Develop a shared language with clinical scientists
- Develop a scientific network that includes clinical colleagues

“ I attended my first ADAA meeting in 2016 and really enjoyed it. As a basic scientist focused on mechanisms underlying mood and anxiety disorders, it is essential that I cultivate close interactions with clinicians to more clearly understand the clinical reality of these disorders. The ADAA meeting is the perfect place to cultivate those interactions. ”

Marianne Seney, PhD
Assistant Professor, Translational Neuroscience Program
Department of Psychiatry
University of Pittsburgh
