FOCUSING RESEARCH ON IMPROVING TREATMENT OUTCOMES
CUTTING EDGE RESEARCH TO OPTIMIZE TREATMENT SUCCESS – TRANSCENDING CULTURAL, RACIAL AND SOCIOECONOMIC BARRIERS

MARCH 28–31
CHICAGO, ILLINOIS

www.adaa.org | #ADAA2019 | @ADAAConference
The Houston OCD Program is located in the historic Heights neighborhood of Houston. The campus has two custom-designed Mediterranean-style buildings offering residential support and outpatient services.

By creating a luxurious, warm and inviting environment, we continue addressing the unique needs of our clients while meeting the rising demand for our evidence-based services. The Houston OCD Program specializes in treating Obsessive-Compulsive and Related Disorders, Anxiety, Phobias and Depression.

We work with our clients to provide a compassionate therapeutic environment while implementing evidence-based treatment techniques to provide the most effective treatment for the individual.

FROM BETH SALCEDO, MD

ADAA President

On behalf of the Board of Directors and myself - welcome to the 2019 ADAA Conference!

This year’s meeting promises to deliver another amazing four days of great learning and sharing. #ADAA2019’s theme “Cutting Edge Research to Optimize Treatment Success – Transcending Cultural, Racial, and Socioeconomic Barriers” is the focus of many sessions and workshops this year. These sessions cover a wide range of exciting research and treatment topics and present opportunities for all attendees to learn and share with old and new friends. I also encourage you to attend some of our new special session offerings including this year’s Presidential Special Session featuring Dr. Howard C. Stevenson, Constance Clayton Professor of Urban Education at The University of Pennsylvania, speaking on “If Elephants Could Talk: Racial Literacy for Healing Racial Stress in Relationships.”

As a proud member of ADAA since 2004, I know firsthand how invaluable it is to belong to such a cutting-edge mental health association. From networking with one’s peers, to collaborating and sharing research and treatment advances, to innovative continuing education opportunities, to the ability to share one’s expertise directly with those who are struggling with anxiety and depression, ADAA is truly my professional “home” and has contributed greatly to my professional development. I know that many of you attending #ADAA2019 share that pride and excitement.

The ADAA conference is engaging and energizing. Our attendees describe it as scholarly, yet friendly and accessible. I can tell you that the time spent talking and networking with people who share your interests is priceless. There is no substitute for putting a name to a face or sharing an experience. We hope you’ll take advantage of the many conference networking opportunities to engage with colleagues between sessions, during the poster sessions, at SIG brown bag events or over breakfast, lunch or dinner. And if you haven’t done so already – please sign up for Friday evening’s Dine-Around at the registration desk. This is a fun way to meet new friends and enjoy Chi-Town’s culinary offerings. And watch out for the “ADAA SurPRIZE” squad throughout the Conference – you might just be the next lucky winner of a special ADAA gift!

Many thanks to Ned H. Kalin, MD, this year’s Conference Committee Chair, and to all the members of the Conference Committee. Their dedication and commitment to ensuring that this year’s event is the best it can be is inspiring. And a special thanks the ADAA Board of Directors and to the small but mighty ADAA staff who have worked so hard all year to bring us together.

I encourage you to introduce yourself to me, the other Board of Director members as well as the staff, committees and special interest group members. We are all eager to welcome you, help you network, and to make sure you get the most out of your conference experience.

P.S. Make sure you Save the Date for #ADAA2020 in San Antonio (March 19-22). We hope you will join us in the Lone Star State and help us celebrate our 40th ADAA Conference!
Welcome! I am honored to be this year’s Conference Chair and am excited about the many “not-to-miss” sessions, workshops, roundtables, new offerings, and special events available for attendees here in the Windy City. The consistent quality and innovative nature of the research and clinical sessions presented at this conference are the reasons I am proud to call ADAA my academic home.

ADAA holds the only meeting of its kind, which unites leaders in the research community from across the U.S. and internationally with clinicians from all mental health disciplines. This year’s meeting theme is particularly exciting as many of our 160+ sessions will focus on the important cutting edge research in the anxiety and depression fields that focus on optimizing treatment success transcending cultural, racial, and socioeconomic barriers.

This year’s keynote address by Alan F. Schatzberg, MD “Potential Drugs of Abuse as Antidepressants and Anxiolytics: Pluses and Minuses” and the Jerilyn Ross Lecture “Ketamine and Mind-Altering Drugs in Treating Anxiety and Depression: Potential Roles and Pitfalls” are two highlights of #ADAA2019. In addition — for the first time — ADAA is sponsoring an interactive day-long panel discussion on suicide prevention led by experts who will focus on innovative research and clinical topics on suicide prevention. Be sure to also attend Friday’s 22nd Annual Research Symposium “New Developments in Stress and Inflammation” which highlights inflammatory processes in stress, anxiety, and depression. Also new this year is Saturday’s “Science Spotlights” featuring two sessions that will highlight cutting edge, topical, research with invited speakers who are conducting paradigm shifting research that will help shape new directions in understanding and treating depression and anxiety disorders.

The Conference is a great way to learn and network, and I hope to see you at our two research poster sessions and at the various Special Interest Group (SIG) gatherings. There is truly something for everyone. Take advantage of this wonderful opportunity to see old colleagues, meet new friends, spark a collaboration, and learn.

I’d like to thank the members of this year’s Conference Committee who worked tirelessly over the past year to ensure a robust and stellar program. A special thank you to our Conference speakers, poster presenters, other committee members, event sponsors and exhibitors, and the ADAA staff.

Please remember to save the date for ADAA’s 40th conference next year. #ADAA2020 will be held from March 19-22 in San Antonio, Texas. I’m delighted to announce that Cindy J. Aaronson, MSW, PhD and Adriana Feder, MD, both from the Icahn School of Medicine at Mount Sinai, NY, will be chairing the ADAA 2020 Conference Committee. I look forward to collaborating with Cindy and Adriana in the months ahead.

It is my sincere hope that you enjoy #ADAA2019 and leave with renewed inspiration for the important research and clinical work you do.

Did You Know?

ADAA has a unique interlinked consumer and professional mission focused on improving quality of life for those struggling with anxiety, depression, OCD, PTSD, and co-occurring disorders through education, practice, and research. More than 38 million people visited www.adaa.org last year seeking treatment information, resources and support provided by our more than 1,800 professional members.
BADGES
Your conference badge is required for admission to all sessions, meals, and receptions. Please wear it during the conference and remove it whenever you leave the hotel.

BREAKFAST AND BREAKS
Friday, March 29 and Saturday, March 30

• Students, Trainees, Postdocs, and Residents only are invited to a complimentary luncheon on Saturday, 12:00 – 1:15 pm, in the Chicago Ballroom 10 (Level 4). Please show your ticket. First-Come, First-Served

MESSAGE BOARD
Located near Registration, Ballroom Level 4. To contact conference participants, you may leave a message on the board. Please use the conference mobile app to connect with other attendees.

RECORDING OR PHOTOGRAPHING
Attendees may not record, via video or audio, or photograph presentations without prior permission from the chair and speakers.

ADAA reserves the right to use any photograph/video taken at any event sponsored by ADAA, without the expressed written permission of those included within the photograph/video. ADAA may use the photograph/video in publications or other media material produced, used or contracted by ADAA including but not limited to: marketing materials, future conference outreach, brochures, invitations, books, newspapers, magazines, television, websites, social media platforms, videos, etc.

A person attending an ADAA event who does not wish to have their image recorded for distribution should make their wishes known to the photographer, and/or the event organizers, and/or contact ADAA at media@adaa.org or 8701 Georgia Avenue, Suite 412, Silver Spring, MD 20910 in writing of his/her intentions and include a photograph. ADAA will use the photo for identification purposes and will hold it in confidence.

By participating in an ADAA event or by failing to notify ADAA, in writing of your desire to not have your photograph used by ADAA, you are agreeing to release, defend, hold harmless and indemnify ADAA from any and all claims involving the use of your picture or likeness.

Any person or organization not affiliated with ADAA may not use, copy, alter or modify ADAA photographs, graphics, videography or other, similar reproductions or recordings without the advance written permission of an authorized designee from ADAA.

Thank you for your understanding and cooperation.

SESSION AND MEETING ROOMS (LEVEL 2)
All session and meeting rooms are located on level 2 with the exception of Columbus, Fountainview Room, Gold Coast, Lakeview, Old Town and Pullman located on Lobby Level 3.

POSTER SETUP, RIVERWALK B (LEVEL 1)

OVERVIEW
The conference aims to leverage its broad audience to synthesize cutting-edge knowledge, accelerate dissemination, and translate scientific evidence to practice by engaging clinicians.

The ADAA Annual Conference is innovative and serves to advance knowledge in unique ways:

1) fostering dissemination and collaboration among basic and behavioral researchers;
2) encouraging researchers and clinicians to discuss practical applications in real-life settings;
3) accelerating translation of research to practice with hands-on training of empirically tested treatments;
4) involving early career investigators, students, and trainees in research and learning; and
5) providing opportunities for professionals to hear patient perspectives. The conference engages all of these audiences, building bridges and supporting these networks throughout the year.

STATEMENT OF NEED
The annual conference of the Anxiety and Depression Association of America (ADAA) is designed to meet the educational needs of member and nonmember clinicians and researchers by providing training, dissemination of evidence-based treatments, and translation of the latest research. Anxiety disorders and depression are common and disabling. Anxiety disorders comprise a diagnostic category that includes generalized anxiety disorder, panic disorder, obsessive-compulsive disorder (OCD), posttraumatic stress disorder (PTSD), social anxiety disorder, and phobias. Lifetime prevalence estimates for all anxiety disorders and major depression are 28.8 percent and 16.6 percent, respectively. Mental illnesses account for more than half as many disability days as all physical illnesses, with anxiety and depressive disorders being the major causes of disability. More than 40 million adults have one or more anxiety disorder, and 19 million adults have depression; anxiety disorders are the most common mental illnesses in children.

Research has long documented the high comorbidity between anxiety disorders and depression; the latest data continues to highlight the importance of understanding the overlap between these disorders, not only with respect to their etiology, but also in terms of treatment course. In 50 percent of diagnoses, individuals have comorbid anxiety and depression. Additionally, anxiety and depression are the primary illnesses associated with suicide. To continue leading the field, ADAA has broadened its mission and vision to encompass anxiety and depressive disorders.

The desired results for the conference are that attendees are aware of the latest developments in preclinical and clinical research, are able to translate this knowledge to clinical practice, apply evidence-based research to practice, discuss real-world clinical experiences to influence research, and develop new skills and techniques to improve diagnosis, prevention, and treatment of anxiety and depressive disorders. It is also expected that researchers and clinicians will discuss how specific diagnoses manifest in the clinic and the reality of implementation of evidence-based and novel treatments in real world settings. Additionally, participants will evaluate and discuss how to use new technologies and social media in research and clinical practice, thus advancing the dissemination and implementation of empirically based and novel treatments.

CONFERENCE EDUCATIONAL OBJECTIVES
After participating in the 2019 Anxiety and Depression Association of America Conference, attendees should be able to:

• Apply new strategies for evidence-based treatments for anxiety and depressive disorders
• Understand the scientific underpinnings of the pathophysiology underlying anxiety and depression
• Identify and discuss new experimental treatment approaches that are being pursued
• Recognize treatment resistance and develop strategies for optimizing responses
• Develop the ability to integrate psychotherapy with pharmacotherapy and other neuromodulatory treatments
• Recognize the importance of cultural, racial, and socioeconomic issues in developing effective treatment strategies

CE and CME credits are available to registered professional physicians, psychologists, social workers, counselors, therapists and nurses. Members do not pay an additional fee; nonmembers can receive credits for an additional fee of $60 per discipline. Only professional attendees can receive CE or CME credits; those paying guest, student, post-doc, trainee or consumer fees cannot apply for CE or CME credits. Online attendance verification, individual session evaluations, overall conference evaluation, and printed certificate must be completed by May 15, 2019 to be eligible for credit.

CE CREDITS
CE Credits are available for professionals through these organizations:

Psychologists:
This course is co-sponsored by Amedco and Anxiety and Depression Association of America (ADAA). Amedco is approved by the American Psychological Association to sponsor continuing education for psychologists. Amedco maintains responsibility for this program and its content. Max 29.5 hours.

Social Workers:
As a Jointly Accredited Organization, Amedco is approved to offer social work continuing education by the Association of Social Work Boards (ASWB) Approved Continuing Education (ACE) program. Organizations, not individual courses, are approved under this program. State and provincial regulatory boards have the final authority to determine whether an individual course may be accepted for continuing education credit. Amedco maintains responsibility for this course. Social workers completing this course receive 29.5 clinical continuing education credits.

Social Workers in New York State:
Amedco SW CPE is recognized by the New York State Education Department’s State Board for Social Work as an approved provider of continuing education for licensed social workers #0115.

California Marriage and Family Therapists, Licensed Clinical Social Workers, Licensed Clinical Counselors, and Licensed Educational Psychologists
The CA MFT Board and BBS accept credits from providers approved by the National Board of Certified Counselors (NBCC) and the American Psychological Association (APA). ADAA is an NBCC provider and is co-sponsoring with Amedco, an APA provider.

Counselors:
Anxiety and Depression Association of America (ADAA) has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 6872. Programs that do not qualify for NBCC credit are clearly identified. ADAA is solely responsible for all aspects of the programs.

Physicians’ assistants and nurse practitioners:
AMA PRA Category 1 Credit™ can only be awarded to MDs or DOs (or physicians with equivalent degrees from other countries). Non-physicians may not be awarded AMA PRA Category 1 Credit™. Non-physicians may, however, receive a certificate of attendance/participation that acknowledges the activity was designated for AMA PRA Category 1 Credit™ in order to apply their participation toward re-licensure.

The American Board of Psychiatry and Neurology accepts Category 1 Credit™ from accredited providers by the American Council for Continuing Medical Education (ACCME). Category 1 Credit™ will be available at the Anxiety and Depression Conference 2019.

CME CREDITS
Accreditation
In support of improving patient care, this activity has been planned and implemented by Amedco LLC and Anxiety and Depression Association of America (ADAA) unless stated otherwise. Amedco LLC is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Amedco LLC designates this live activity for a maximum of 29.5 AMA PRA Category 1 Credits™ for

continued next page
CONTINUING EDUCATION

physicians. Learners should claim only the credit commensurate with the extent of their participation in the activity.

Maintenance of Certification for Psychiatrists
The American Board of Psychiatry and Neurology accepts Category 1 CME Credits™ from accredited providers by the American Council for Continuing Medical Education (ACCME). Category 1 CME Credits™ will be available at the Anxiety and Depression Conference 2019.

Self-Assessment Maintenance of Certificate Session Assessment (SAMOC Sessions)
The following sessions are eligible for SAMOC credits:

- 104C: Neurostimulation in the Evolving Treatment Paradigm for Depression and Anxiety (Sunday, 11:00 AM - 1:00 PM)
- 108C: Anxiety and Depression Rounds (Saturday, 3:30 - 5:30 PM)
- 337R: Therapeutic Potential of GABA-A Receptor Positive Allosteric Modulators in Major Depressive Disorders (Saturday, 10:30 AM - 12:00 PM)
- 159C: Does 1+1 Always Equal 3? An Update on Combining Psychotherapy with Medications (Sunday, 8:00 - 9:00 AM)
- 352R: Novel Targets - Novel Treatments: Next-Generation Intervention Research in Childhood Anxiety and Related Disorders (Saturday, 1:30 - 3:00 PM)
- 328R: Neurobiological Factors Underlying Resilience to Stress and Adversity (Friday, 5:15 - 6:45 PM)

To earn Self-Assessment MOC Credits:

- Once you have attended the session, or viewed the presentations in the online program, you can complete the post-test assessment as you apply for CME credits and follow the process outlined in “How to Apply for CE and CME Credits.”

HOW TO APPLY FOR CE AND CME CREDITS

1) You should have received an e-mail before the ADAA Conference with your current login for the submission database, which is the same system used for the CE and CME credit process. If you registered on-site, you will receive the email during the week following the conference.

2) At the conclusion of each session, complete the individual session evaluation for all sessions you attended, complete an overall conference evaluation, and then print, download or email your official certificate. Ethics credits earned will be indicated on the certificate. ABPN certificates will be sent separately in May following the verification of completion of all assessment activities.

3) Use the printed “Schedule at a Glance” or the “Itinerary” option in the Conference Mobile App to track the sessions you attend. This will assist you in the online evaluation process. You do not need to return any forms to ADAA.

All steps above must be completed by May 15, 2019.

Direct all questions regarding CE or CME to conference@adaa.org, or call 240-485-1031.
Features:

✅ Disorder checklist includes all anxiety disorders, OCD, and related conditions.

✅ Treatment checklist includes evidence-based therapies or enter any model you choose.

### Major Depressive Disorder (MDD)  
#### PH94B  
(pregnenyneone)  
for SAD  
(entering Phase 3)
- Self-administered nasal spray
- First-in-class neurosteroid activates nasal chemosensory neurons
- No hormonal effects
- Triggers neural impulses to parts of the brain that suppress anxiety
- PRN treatment
- Rapid-onset in 10-15 minutes
- No systemic exposure
- Non-sedating, non-addictive
- Exceptionally well-tolerated in multiple clinical trials
- Potential to be first FDA-approved PRN treatment

### Social Anxiety Disorder (SAD)  
#### AV-101  
(4-chlorokynurenine)  
for MDD  
(in Phase 2)
- Oral
- NMDA receptor glycine site antagonist
- Inhibits NMDA receptor activity, does not block it
- Rapid-onset antidepressant effects in preclinical studies
- Exceptionally well-tolerated in multiple clinical studies
- No psychological side effects
- Non-sedating, non-addictive
- Convenient at-home administration
- FDA Fast Track designation
- Potential adjunctive and first line therapy

### PH10  
(andorstadienol)  
for MDD  
(in Phase 2)
- Self-administered nasal spray
- First-in-class neurosteroid activates nasal chemosensory neurons
- No hormonal effects
- Triggers neural impulses in parts of the brain producing antidepressant effects
- Convenient at-home administration
- Rapid-onset antidepressant effects
- No systemic exposure
- Non-sedating, non-addictive
- No psychological side effects
- Potential adjunctive and first-line therapy
“I am forever grateful for the support the OCD Institute gave me; I don’t know where I would be if I hadn’t gone to McLean.”

— Former McLean patient

Together we can help people live better with the power of “Keen” awareness.

Keen is a smart bracelet that uses custom gesture detection and a gentle vibration to help your patients develop awareness of their hands.

Before Keen Awareness

After Keen Awareness

With the power of “Keen” awareness, your patients can practice strategies and take control of hair pulling, skin picking, nail biting and other unwanted behaviors.

Keen was created out of personal need, with NIH-funded research underway.
