WELCOME FROM THE CONFERENCE CO-CHAIRS

On behalf of the Annual Conference Committee, we are delighted to welcome you to this year's conference. We are honored to be the co-chairs of the Anxiety and Depression Conference 2015. ADAA has played an important role in our career development, and we are pleased to be here celebrating ADAA's 35th anniversary.

The conference theme **"Anxiety and Depression: Translating Research, Innovating Practice"** highlights ADAA's commitment to integrating the best that each area has to offer. We are very excited that Helen Mayberg, MD, a leading pioneer in neural imaging and deep brain stimulation approaches to depression, will deliver the keynote address. David Barlow, PhD, Founder and Director Emeritus of the Center for Anxiety and Related Disorders, will present the Jerilyn Ross Lecture.

There are many not-to-miss sessions. On Friday we have two featured sessions: the 18th annual Scientific Research Symposium with an expert panel led by Diego Pizzagalli, PhD, addressing the important topic "Psychobiology of the Intersection and Divergence of Depression and Anxiety" and a plenary lecture by George Koob, PhD, Director of the National Institute on Alcohol Abuse and Alcoholism (NIAAA). New this year is a Clinical Practice Symposium, highlighting a complex case with a standardized patient and several clinical experts discussing how to treat.

With the 150-plus sessions to choose from, there is definitely something for everyone. But to get the most out of this meeting, we highly recommend that you make the time to connect and network during breakfast, coffee breaks, and poster sessions. Come back to the Hyatt for our Saturday night dance party and dance the night away.

It takes so many people to put together a top quality conference, so we want to thank all of the speakers, poster presenters, committee members, and ADAA staff who have made this a world-class conference.

Please take a minute to say hello during the meeting. We hope you all enjoy the meeting.
Best,

Kerry Ressler, MD, PhD, and Tanja Jovanovic, PhD

WELCOME FROM THE PRESIDENT

Dear Colleagues,

On behalf of the Board of Directors, I want to add my welcome to the conference. You have chosen to attend a terrific meeting that brings together smart, dedicated, and innovative clinicians and researchers focusing on anxiety disorders and depression. We hope you will take advantage of the many opportunities to engage with colleagues in between sessions, at a poster, or over a cup of coffee. This meeting is special because of the efforts of many individuals. A special thank you goes to Kerry Ressler and Tanja Jovanovic, the conference co-chairs, and the members of the conference committee. This is a labor of love, and the members of the committee work behind the scenes all year to pull this together.

I have been a member since 1991. So it is especially meaningful to me to be here to celebrate ADAA's 35th anniversary. What made me stay involved for nearly 25 years? Being part of ADAA has enriched my professional career and given me opportunities to connect with and learn from my colleagues and friends — researchers at the cutting edge of science and dedicated clinicians providing thoughtful and compassionate care — all in the service of doing our utmost to help our patients affected by these distressing and often disabling conditions. It has also given me a voice in a community that advocates for education, research, and care.

The biggest benefit of attending a conference are the people. I encourage you to take some time to meet members of the Board of Directors, committees, and special interest groups. These volunteers contribute generously to our community and make ADAA a dynamic and engaging organization. They can help connect you with those who have mutual interests and show you how to get the most out of your membership throughout the year.

Enjoy the conference,

MEMBER RECOGNITION AWARDS

JERILYN ROSS CLINICIAN ADVOCATE AWARD

This award honors the memory and life work of Jerilyn Ross, co-founder of ADAA and its president from 1985–2010. Jerilyn was an energetic, outspoken advocate for anxiety disorders. She was a pioneer, speaking out in the 1970s about her own phobia and panic when the term “panic disorder” was yet to be coined. Her passion to teach clinicians about treatment, educate the public, and engage researchers sparked an exciting partnership that changed many lives. The Jerilyn Ross Clinician Advocate Award acknowledges individuals who exemplify clinical excellence and advocacy.

David Barlow, PhD, receives the Jerilyn Ross Clinician Advocate Award this year. David joined ADAA in 1989, and he served on the Board of Directors and the Scientific Council in the 1990s. He is the founder and director emeritus of the Center for Anxiety and Related Disorders and a professor of psychology and psychiatry at Boston University.

His clinical research focuses on understanding the nature of anxiety and depression and developing new treatments for emotional disorders. He has published hundreds of articles and chapters and numerous books in the area of the nature and treatment of emotional disorders. As a pioneer and leader in the field for many years, David honors Jerilyn’s legacy.

MEMBERS OF DISTINCTION

ADAA recognizes individuals who have been members for ten years or longer who advance the organization’s mission through significant service and commitment. These members strengthen ADAA. We are pleased to recognize these two recipients.

A renowned expert on mood and anxiety disorders, **Daniel S. Pine, MD**, joined ADAA in 1996, after having received an early young investigator award. He chaired the Scientific Council in 2012–13, the conference in 2010, and the Scientific Research Symposium in 2005. Danny is also an editor of the upcoming ADAA publication *Anxiety Disorders Primer* (Oxford University Press, 2015). Today he works as the Chief of the Section on Development and Affective Neuroscience in the National Institute of Mental Health (NIMH) Intramural Research Program.

Kimberly Morrow, LCSW, is the current chair of the ADAA Recruitment and Retention Committee and the past chair of the Award Committee. She is dedicated to helping people who suffer with anxiety, and she is passionate about teaching professionals how to treat anxiety disorders successfully. Kimberly and two colleagues developed a video for ADAA to train master’s level graduate students on that topic, and the video is visible on our website. A member since 2000, Kimberly received an ADAA clinician outreach award in 2012.

2015 AWARDS PROGRAM

CAREER DEVELOPMENT TRAVEL

AWARD WINNERS

Since 1998 ADAA has supported the next generation of clinicians and researchers with this award. The travel awards are given to encourage early career professionals who have a research interest in anxiety disorders and depression. Award winners present their research at the annual conference, and they are paired with a mentor to learn about ADAA and its membership. Through unique partnerships, winners also have an opportunity to present their research at either the ACNP or ABCT annual meetings.

CAREER DEVELOPMENT LEADERSHIP PROGRAM

SECOND ANNUAL PROGRAM

Through a competitive selection process this initiative brings together early career clinicians and researchers from multiple disciplines to provide an intensive mentoring and professional development opportunity.

An interactive learning experience, the program challenges thinking and encourages creative discourse about anxiety disorders, OCD, PTSD, and depression among a diverse community of professionals. This highly participatory program features outstanding leaders in the field, who will initiate stimulating discourse to shape ideas, collaboration, and crosscutting discussions that engage clinicians and researchers in new ways of thinking about the future.

Understanding Mental Disorders

Your Guide to DSM-5®

American Psychiatric Association

A vital resource for anyone who has been touched by mental illness

Based on the latest, fifth edition of the *Diagnostic and Statistical Manual of Mental Disorders*—known as DSM-5®—**Understanding Mental Disorders** provides valuable insight on what to expect from an illness and its treatment—and will help readers recognize symptoms, know when to seek help, and get the right care.

The common language for diagnosing mental illness used in DSM-5® for mental health professionals has been adapted into clear, concise descriptions of disorders for nonexperts and ways to get help.

For more resources and information, go to **www.psychiatry.org/UnderstandingMentalDisorders**

“This is a simple, user-friendly guide that is clear and informative. The format makes it easy to look up information about specific disorders and the vignettes make this a valuable resource for clinicians, patients and their families.”—*Alies Muskin, Executive Director, Anxiety and Depression Association of America*

UPDATE FROM THE BOARD

EMBRACE THE FUTURE WITH ADAA

This year ADAA celebrates its 35th anniversary. ADAA was the first organization to bring attention and focus to education, training, and research about anxiety disorders. We started the conversation by advancing and disseminating research; implementing new, evidenced-based treatments; and educating the public that these disorders are real, serious, and treatable. For 35 years ADAA has been offering help and hope to individuals and families and providing support to those who practice and conduct research. Today ADAA is the only organization that gives voice to our community of patients and professionals with diverse backgrounds and expertise in practice and research who focus on anxiety disorders and depression.

Over the years we have launched campaigns to highlight and educate about different disorders. With the new federally supported BRAIN Initiative, we may have the greatest opportunity to advance the field. Given the prevalence and morbid impact of the anxiety disorders, depression, OCD, and PTSD and the prediction that by 2020 depression will be the most burdensome illness worldwide, the need for ADAA has never been greater.

ADAA will make a difference—by changing the conversation to one that focuses attention on early diagnosis, treatment, and prevention. To this end, ADAA continues its longstanding tradition and core value that education is power. We continue to be a first-line resource for those struggling with anxiety and depressive disorders. To make it easier for patients to find professionals, ADAA redesigned the online Find a Therapist Directory to allow for broader descriptions, photos, and listing of disorders treated and interventions offered. Website visitors in 2014 nearly doubled compared to 2013, with 9,340,948

pageviews vs. 5,050,066 the previous year. You can join ADAA's growing presence on social media by liking our Facebook page and following us on Twitter. With the help of the members of the Public Education Committee; ADAA offered 12 free well-received webinars to the public; posted numerous articles to Huffington Post; and responded to media requests from print, online, and production sources. Additionally, ADAA members were featured in some of the most popular posts on Care for Your Mind, an online blog for those affected by the mental health care system.

ADAA expands its scope by providing education and training to all clinicians. The Professional Education Webinar Committee organized more than a dozen webinars on a wide array of topics, and this year we have expanded our offerings. We were approved by the American Board of Psychiatry and Neurology (ABPN) to provide Maintenance of Certification and Self-Assessment credits for Board-certified psychiatrists. This spring we will begin offering two new online continuing education programs: CE credits for live online webinars and group consultation series. Additional resources that will be available in 2015 include practice guidelines that summarize evidence-based pharmacotherapy and psychotherapy for treating each disorder and reviews of mobile apps. Looking to the future, ADAA will expand its education efforts to focus on training for psychiatric nurses and nurse practitioners and offering CNE credits.

ADAA leads the evolving conversation about research. Our history has focused on integrating basic and clinical cross-disciplinary research. We will take this further by fostering discussions on a broad array of disciplines that encourage incorporating patients' perspectives on research as well. In

UPDATE FROM THE BOARD

addition, ADAA has partnered with two new kinds of research networks. ResearchMatch, funded by NIH, has developed an anxiety disorder-patient portal to facilitate research efforts. And we are a stakeholder participant in a PCORI-funded project to create a patient-powered research mood network.

ADAA's commitment to young professionals and emerging leaders continues. Our Career Development Leadership Program, now in its second year, involves basic and clinical researchers and clinicians with diverse backgrounds in an intensive mentoring and leadership development experience. Identifying emerging professionals and developing a cadre of young leaders will seed the next generation of leaders. ADAA continues to give travel and clinician trainee awards in recognition of early career achievements—all with the goal of fostering the next generation of clinicians and scientists who will make important contributions to the care of our patients. To bring all students, trainees, postdoctoral fellows, and residents together with senior leaders and the Early Career Professional Special Interest Group, ADAA will host a luncheon on Saturday—another example of our commitment to connecting people across generations.

Let's talk seriously about anxiety disorders, OCD, PTSD, and depression as real, serious, and treatable illnesses to eliminate the stigma that prevents those in need from getting care. We know that these disorders are serious, that they impact not only the individual, but families, children, other loved ones, colleagues, and community. Together we can give hope and help to all with these disorders.

You are an important part of ADAA. Won't you join us to move ADAA forward to **"40 in 2020"**? **Our vision is to grow an organization where clinicians and researchers from diverse backgrounds—as well as patients—build partnerships that inform, enrich, and innovate efforts.** We are working toward a future with

a wide array of accessible treatments and innovative work that lead to the prevention and cure of these distressing and disabling disorders.

THIS IS OUR FUTURE. HOW WILL YOU CONTRIBUTE?

Join ADAA in recognizing members who were pioneers and have remained committed to furthering the mission of ADAA since its beginning in the 1980s.

The EMDR Institute offers quality trainings in EMDR therapy, which is an empirically validated and widely recommended frontline trauma treatment. A meta-analysis (Lee & Cuijpers, 2013, JBTEP) has demonstrated the contribution of the eye movement component. Standardized procedures achieve trauma resolution without the need for extended exposures, homework, or detailed descriptions of the event.

OVERVIEW

The conference aims to leverage its broad audience to synthesize cutting-edge knowledge, accelerate dissemination, and translate scientific evidence to practice by engaging clinicians.

The Anxiety and Depression Conference 2015 is novel and actively works to advance knowledge in unique ways: 1) fostering dissemination and collaboration among basic and behavioral researchers; 2) encouraging researchers and clinicians to discuss practical applications in real-life settings; 3) accelerating translation of research to practice with hands-on training of empirically tested treatments; 4) involving early career investigators, students, and trainees in research and learning; and 5) providing opportunities for professionals to hear patient perspectives. The conference engages all of these audiences, building bridges and supporting these networks throughout the year.

STATEMENT OF NEED

The Anxiety and Depression Conference 2015 is designed to meet the educational needs of member and nonmember clinicians and researchers by providing training, dissemination of evidence-based treatments, and translation of the latest research.

Anxiety disorders and depression are common and disabling. Anxiety disorders comprise a diagnostic category that includes generalized anxiety disorder, panic disorder, obsessive-compulsive disorder (OCD), posttraumatic stress disorder (PTSD), social anxiety disorder, and phobias. Lifetime prevalence estimates for all anxiety disorders and major depression are 28.8 percent and 16.6 percent, respectively. Mental illnesses account for more than half as many disability days as all physical illnesses, with anxiety

and depressive disorders being the major causes of disability. More than 40 million adults have one or more anxiety disorder, and 19 million adults have depression; anxiety disorders are the most common mental illnesses in children.

Research has long documented the high comorbidity between anxiety disorders and depression; the latest data continues to highlight the importance of understanding the overlap between these disorders, not only with respect to their etiology, but also in terms of treatment course. In 50 percent of diagnoses, individuals have comorbid anxiety and depression. Additionally, anxiety and depression are the primary illnesses associated with suicide. To continue leading the field, ADAA has broadened its mission and vision to encompass anxiety and depressive disorders.

The desired results for the conference are that attendees are aware of the latest developments in preclinical and clinical research; are able to translate this knowledge to clinical practice; apply evidence-based research to practice; discuss real-world clinical experiences to influence research; and develop new skills and techniques to improve diagnosis, prevention, and treatment of anxiety and depressive disorders. It is also expected that researchers and clinicians will discuss how specific diagnoses manifest in the clinic and the reality of implementation of evidence-based and novel treatments in real world settings. Additionally, participants will evaluate and discuss how to use new technologies and social media in research and clinical practice, thus advancing the dissemination and implementation of empirically based and novel treatments.

CONTINUING EDUCATION

Conference Educational Objectives

After participating in the Anxiety and Depression Conference 2015, attendees should be able to

- Recognize advances in diagnosis and treatments for anxiety, depression, and related disorders.
- Improve patient outcomes through the dissemination of evidence-based research and application to real-world clinical settings.
- Identify the etiology, pathophysiology, and neural pathways of anxiety and depressive disorders.
- Apply psycho- and pharmacotherapy interventions alone and in combination to develop treatment plans, predict treatment response, optimize remission, and prevent relapse.
- Discuss and innovate research on anxiety, depression, and related disorders.

CE and CME credits are available to registered professional physicians, psychologists, social workers, counselors, therapists and nurses.

Members do not pay an additional fee;

nonmembers can receive credits for an additional fee of \$55 per discipline. Only professional attendees can receive CE or CME credits; those paying guest, student, or consumer fees cannot apply for CE or CME credits. Attendance verification forms and online evaluations must be completed by **June 5, 2015**, to be eligible for credit.

CE CREDITS

CE Credits are available for professionals through these organizations:

Psychologists: ADAA is approved by the American Psychological Association to sponsor continuing education credits for psychologists. ADAA maintains responsibility for this program and its content. CE credits for psychologists are granted on a 1 credit per contract basis.

Social Workers: This program is approved by the National Association of Social Workers (**Approval #886437837-6063**) for social work continuing education contact hours.

Counselors: This program is approved by the National Board for Certified Counselors (**Approval Number: SP-2473**) for continuing education credits.

Physicians' assistants and nurse practitioners: *AMA PRA Category I Credit™* can only be awarded to MDs or DOs (or physicians with equivalent degrees from other countries). Non-physicians may not be awarded *AMA PRA Category I Credit™*. Non-physicians may, however, receive a certificate of attendance/participation that acknowledges the activity was designated for *AMA PRA Category I Credit™* in order to apply their participation toward re-licensure.

HOW TO APPLY FOR CE CREDITS

1. You will receive an email at the start of the ADAA Conference with a customized login for all session evaluations. Session evaluations will be made available as they end. If you registered on-site, you will receive the email during the week following the conference. You will briefly evaluate the sessions you attended, complete an overall conference evaluation, and your official certificate will be available for you to download immediately. Ethics credits earned will be indicated on the certificate.

2. Track your session attendance with the schedule-at-a-glance handout provided during posted registration hours. This will assist you in the online evaluation process. You do not need to return this form to ADAA; keep it for your records.

3. Complete the online evaluations via the customized email and download your CE certificate. All steps above must be completed by **June 5, 2015**. No exceptions.

Direct all questions regarding CE to conference@adaa.org, or call 240-485-1032. For questions regarding the online CE process, contact CE-Go at 877 248 6789, ext. 5.

CME CREDITS

Accreditation

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Blackwell Futura Media Services and the Anxiety and Depression Association of America. Blackwell Futura Media Services is accredited by the ACCME to provide continuing medical education for physicians.

Designation

Blackwell Futura Media Services designates this live activity for a maximum of 26.5 AMA PRA Category I Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Blackwell Futura Media Services and ADAA present this activity for educational purposes only and do not endorse any product, content of presentation, or exhibit. Participants are expected to utilize their own expertise and judgment while engaged in the practice of medicine. The content of the presentations is provided solely by presenters who have been selected because of their recognized expertise.

Faculty Disclosure

It is the policy of Blackwell Futura Media Service to plan and implement all of its educational activities in accordance with the ACCME's Essential Areas and Policies to ensure balance, independence, objectivity, and scientific rigor. In accordance with the ACCME's Standards for Commercial Support, everyone who is in a position to control the content of an educational activity certified for *AMA PRA Category I Credit™* is required to disclose all financial relationships with any commercial interests within the past 12 months that creates a real or apparent conflict of interest. Individuals who do not disclose are disqualified from participating in a CME activity. Individuals with potential for influence or control of CME content include planners and planning committee members, authors, teachers, educational activity directors, educational partners, and others who participate, e.g., facilitators and moderators. This disclosure pertains to relationships with pharmaceutical

companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. Any real or apparent conflicts of interest related to the content of the presentations must be resolved prior to the educational activity. Disclosure of off-label, experimental, or investigational use of drugs or devices must also be made known to the audience.

Maintenance of Certification for Psychiatrists

The American Board of Psychiatry and Neurology has reviewed the Anxiety and Depression Conference 2015 and has approved this program as part of a comprehensive CME program, which is mandated by the ABMS as a necessary component of Maintenance of Certification. This activity is approved for up to a maximum of 29.5 AMA PRA Category I CME credit.

HOW TO APPLY FOR CME CREDITS

1. You will receive an email at the start of the conference with a customized login for all session evaluations. Session evaluations will be made available as they end. If you registered on-site, you will receive the email during the week following the conference. You will briefly evaluate the sessions you attended and complete an overall conference evaluation. Your official certificate will be available for you to download immediately.

2. Track your session attendance with the schedule-at-a-glance handout provided during posted registration hours. This will assist you in the online evaluation process. You do not need to return this form to ADAA; keep it for your records.

3. Complete the online evaluation via the customized email and download your CME certificate. All steps above must be completed by **June 5, 2015**. No exceptions.

NOTES

Rediscover...

Life. Worth. Living.

At Rogers, cognitive behavioral therapy is at the foundation of each treatment program, including OCD and anxiety, depression and mood disorders, eating disorders, posttraumatic stress disorder and addiction. Our treatment team works with patients to build a toolbox of effective, evidence-based strategies they can use for a lifetime. This graduated, manageable approach may include:

- Cognitive restructuring
- Exposure and response prevention
- Behavioral activation
- Prolonged exposure

Call **800-767-4411** for a free screening or visit rogersbh.org.

Locations in Tampa Bay, Nashville and Southeastern Wisconsin.

HOUSTON OCD PROGRAM

Quality care. Compassionate atmosphere.

The Houston OCD Program is moving into a brand-new, custom-designed residential treatment facility in the historic Heights neighborhood of Houston. By creating a luxurious, warm and inviting environment, we will continue to address the unique needs of our clients while meeting the rising demand for our evidence-based services.

OUR SERVICES INCLUDE:

- Residential Support Program
- Intensive Outpatient Program
- Specialty Outpatient Program
- Diagnostic & Treatment Consultations

We look forward to seeing you at our conference exhibit. You can visit our team members who will be presenting at this year's ADAA Conference:
