For adults with OCD and young adults with depression or other mood disorders...

Help Has a New Home

Placing your patients' care in the hands of others is a decision you don't take lightly, especially when you're recommending residential treatment. You need the reassurance of a place with the proven clinical expertise to help empower your patients to gain control over their symptoms—and to provide this care within a warm and supportive environment.

Rogers Memorial Hospital's newly expanded **OCD Center at Cedar Ridge** is just such a place, designed to enhance the patient experience and better support the treatment process. While **FOCUS**, our new residential program for young adults with depression or other mood disorders, helps patients step into adulthood with confidence. Located in southeastern Wisconsin, both programs are built on a foundation of evidence-based care and nationally recognized expertise in cognitive behavioral therapy.

To learn more about Rogers, call **800-767-4411** or visit **rogershospital.org**.

Welcome to the ADAA Annual Conference

On behalf of the Annual Conference Committee, we are delighted to welcome you to the 34th ADAA Annual Conference. We expect that here you will find the intellectual stimulation, friendliness, and collegiality that have drawn us to ADAA for many years.

The theme of this year's conference, *Personalized Treatments for Anxiety and Mood Disorders*, embraces the new scope of the organization—both anxiety disorders and depression. This theme is in line with current efforts to individualize interventions to patients' needs and dispositions. We are very excited to have Dr. Jordan Smoller, a recognized expert on genetic determinants of childhood and adult psychiatric disorders, deliver the keynote *Will Genetic Research Help Us Find Better Treatments?*

This year's meeting brings together top-notch researchers and clinicians whose work focuses on anxiety disorders and depression. We are happy to welcome Dr. Zindel Segal, who will present the Jerilyn Ross Lecture: *What Is the Role of Mindfulness Meditation in the Treatment of Anxiety Disorders? Indicators, Caveats, and Empirical Status.*

In addition to a world-class scientific program, this conference provides a tremendous opportunity to meet colleagues, establish new friendships and professional relationships, as well as build your network.

We look forward to meeting you!

Sincerely,

Mark Powers, PhD, and Jasper Smits, PhD

Dear Colleagues,

On behalf of the Board of Directors, I want to add my welcome to the conference. You have chosen to attend a terrific meeting. It is the best gathering of clinicians and researchers focusing on anxiety disorders and depression. We hope you discover the best of this meeting — the people. They are friendly and will easily engage in discussion over a cup of coffee.

This meeting is special because of the efforts of many people. A special thank you goes to Jasper Smits and Mark Powers, the conference co-chairs, and the members of the conference committee. They work behind the scenes all year to pull this together. We are pleased to recognize our award winners. A special thanks to Jim Abelson, Kimberly Morrow, Danny Pine and Kerry Ressler for coordinating this initiative.

I encourage you to take some time at this meeting to meet members of the Board and other committees. These volunteers contribute generously to our community and make ADAA a dynamic and engaging organization. There are a few people we want to thank and recognize for their service to ADAA. First, a big round of applause to Jerry Rosenbaum, past president, and Lisa Hale for their service on the Board. Many thanks to several members who made time to make a difference: Risa Weisberg for helping to shape the conference volunteering on the committee, serving as chair in 2009 conference, and being the first conference coordinator; Danny Pine, who has served as chair of the Scientific Council for the past two years; and Reid Wilson, who completed his term as chair of the Awards Committee.

Throughout the meeting there are Special Interest Groups and other gatherings to help you find others with mutual interests. We hope you take advantage of these opportunities.

Enjoy the conference,

Member Recognition Awards

Jerilyn Ross Clinician Advocate Award

This award honors the memory and life work of Jerilyn Ross, co-founder of ADAA and its president from 1985–2010. Jerilyn was an energetic, outspoken advocate for anxiety disorders. She was a pioneer, speaking out in the 1970s about her own phobia and panic when the term “panic disorder” was yet to be coined. Her passion to teach clinicians about treatment, educate the public, and engage researchers sparked an exciting partnership that changed many lives. The Jerilyn Ross Clinician Advocate Award acknowledges individuals who exemplify clinical excellence and advocacy.

Reid Wilson, PhD, is the recipient this year of the Jerilyn Ross Clinician Advocate Award. His commitment to ADAA is exemplary. A member since the early 1980s, Reid worked closely with Jerilyn, and he served on the Board of Directors for 12 years. He has been chair of the annual meeting a few times, including in 1991, the last time ADAA met in Chicago.

Reid works tirelessly to promote treatment for anxiety disorders. His website, www.anxieties.com, has been visited by millions. He is the author of several books, including *Stop Obsessing*, with Edna Foa, and most recently *Anxious Kids, Anxious Parents*, with Lynn Lyons. His book *Facing Panic*, read by thousands, was donated to ADAA to sell to help support the organization's patient-education efforts. Reid travels around the world training clinicians to provide effective evidence-based treatment for anxiety disorders. His work has improved many lives, and it honors the legacy of Jerilyn Ross.

Members of Distinction

ADAA recognizes individuals who have been members for ten years or longer who advance the organization's mission through significant service and commitment. These members strengthen ADAA. We are pleased to recognize these two recipients.

One of the original members of ADAA, **Robert Ackerman, MSW**, is a social worker in Brooklyn, New York. Bob has introduced several generations of attendees to ADAA. He created the Anxiety Disorders Rounds session over 15 years ago, and he still organizes experts to present cases at the conference. Bob's longstanding active support of ADAA is exemplary.

As Editor of *Depression and Anxiety*, **Peter Roy-Byrne, MD**, has made it a labor of love and his mission to improve the journal. Today *Depression and Anxiety* ranks 22/135 in psychiatry and in psychology 8/114 (Clinical); 9/75 (Psychology). Actively involved with ADAA since 1995, Peter has served as a mentor and as conference chair in 2005.

CAREER DEVELOPMENT TRAVEL AWARD WINNERS

Since 1998 ADAA has supported the next generation of clinicians and researchers with this award. The travel awards are given to encourage early career professionals who have a research interest in anxiety disorders and depression. Award winners present their research at the annual conference, and they are paired with a mentor to learn about ADAA and its membership. Through unique partnerships, winners also have an opportunity to present their research at either the ACNP or ABCT annual meetings.

DONALD F. KLEIN EARLY CAREER INVESTIGATOR AWARD

This award is given for the best original research paper on neurobiology, psychopharmacology, psychosocial treatments, or experimental psychopathology of anxiety disorders and depression. It is named for Donald F. Klein, MD, who revolutionized psychiatric thinking and received an ADAA Lifetime Achievement Award. The winner will present the winning paper at the annual conference, and it will be published in *Depression and Anxiety*, the official ADAA journal. The award is supported by Wiley-Blackwell, the publisher of *Depression and Anxiety*.

Career Development Leadership Program

First Annual Program

ADAA selected the first peer cohort for its new Career Development Leadership Program. Through a competitive selection process this initiative will bring together early career clinicians and researchers from multiple disciplines to provide an intensive mentoring and professional development opportunity.

An interactive learning experience, the program challenges thinking and encourages creative discourse about anxiety disorders, OCD, PTSD, and depression among a diverse community of professionals. This highly participatory program features outstanding leaders in the field, who will initiate stimulating discussions that shape ideas, collaboration and cross-cutting discussions that engage clinicians and researchers in new ways of thinking about the future.

Fundraising

We are very grateful to all our donors, many who give \$10 to help. The individuals and businesses below have contributed generously (more than \$100). All proceeds support the ADAA Awards Program and our public education efforts to expand awareness of anxiety, depression, and related disorders and their treatment, including our campaign to reach millions of college students in the United States.

ADAA thanks all donors for contributing to the success of our work in helping people who are struggling get necessary treatment; advocate for the prevention, treatment, and cure of anxiety, depression, and related disorders; and provide free educational information to patients and their families.

WANTED: Used Electronic Devices

Help ADAA and get rid of your old smartphones, Blackberrys, Nooks, iPods, Kindles, and other electronics.

We have partnered with Revivn, a company that recycles smartphones (iPhones, Samsung, LG, Android), Blackberrys, e-readers, iPods, iPads, and other electronic devices whether they are broken or in working order.

Revivn will pay ADAA for each device, and the funds will support our professional and public education activities. Find more details at revivn.com/adaa

Here's what to do:

Drop your old and used smartphones, Blackberrys, Kindles, Nooks, iPods, iPads, and other electronic devices to the Registration desk on the 5th floor.

OR

Send your electronic devices to ADAA, 8701 Georgia Ave., #412, Silver Spring, MD 20910

Revivn wipes clean all stored information, guaranteeing your privacy. You will receive a receipt for your donation.

JERILYN ROSS LECTURE

This special lecture honors the memory and life work of Jerilyn Ross, a cofounder of ADAA and a pioneer in the mental health field. Jerilyn served as president and CEO for 25 years until her death in 2010. She was an ardent public health advocate and clinician. Jerilyn had her first panic attack in her twenties, and she talked openly about feeling frightened and alone. After finding treatment, her commitment to helping others spurred the founding of ADAA. Her vision was to bring together clinicians, researchers, and patients in support of advancing science, treatment, and education. Your participating here today is her legacy.

Advanced

Chair: W. Edward Craighead, PhD, Emory University

Comorbidity of Depression and PTSD in a Highly Traumatized Civilian Cohort: Can Biomarkers Provide Specificity?, Kerry Ressler, MD, PhD, Emory University

Neurobiology Mediating Effects of Early Life Trauma on Depression Treatment, Charles B. Nemeroff, MD, PhD, University of Miami School of Medicine

Lessening the Negative Impact of Anxiety Comorbidity on Mood Disorders Outcomes: Therapeutic Perspectives, Michael E. Thase, MD, University of Pennsylvania

Behavioral Activation for Depressed Adolescents: Predictors of Treatment Outcomes, W. Edward Craighead, PhD, ABPP, Emory University

310R—The Role of Glutamate-Related Functions in the Stress Response: Preclinical Models

(Michigan/Michigan State—6th floor)

Advanced

Chair: Justine M. Kent, MD, Janssen Pharmaceuticals

Panic Disorder and Agoraphobia: Novel Glutamate Mechanisms and Therapeutic Approaches From Preclinical Models, Anantha Shekhar, MD, PhD, Indiana University

Influence of Positive Allosteric Modulation of the mGluR2 Receptor on the Behavioral Responses in Animal Models of Depression, Luc Ver Donck, PhD, Janssen Pharmaceutica NV, Belgium

Influence of Maternal Glutamatergic Stress Response on the Neurobiology of the Offspring, Jeremy Coplan, MD, SUNY Downstate Medical Center, Brooklyn

Discussant: Jack M. Gorman, MD, Franklin Behavioral Health

313R—Enhancing Interventions for Anxious Youth: Parenting Behaviors as Mediators of Treatment Response

(Lincolnshire 1/2—6th floor)

Intermediate

Chair: Megan E. Hughes, PhD, Weill Cornell Medical College

Parent Emotion-Socialization Practices and Child Self-Regulation as Predictors of Child Anxiety: The Mediating Role of Cardiac Variability, Sarah R. Williams, PhD, Johns Hopkins University

The Child Anxiety-Prevention Study: Parenting Mediators of 12-Month Outcomes, Kelly L. Drake, PhD, Johns Hopkins University

Enhancing Treatment Outcome for Anxious Youth: An Investigation of Case Formulation-Driven CBT, Sonja Breinholst, PhD, MSc, University of Copenhagen
Can Parental Involvement in Their Anxious Child's Treatment Increase Reflective Ability in the Parent?, Barbara H. Esbjorn, PhD, University of Copenhagen

Friday (11:30 AM –1:00 PM, continued)

321R—Functional MRI Predictors of Response to Cognitive-Behavioral Therapy in Adult and Pediatric Patients With Anxiety Disorders

(Great America—6th floor)

Intermediate

Chair: Heide Klumpp, PhD, University of Illinois at Chicago

Neural Predictors of Cognitive-Behavioral Therapy Treatment Response for Generalized Anxiety Disorder and Panic Disorder, Robin Aupperle, PhD, University of Missouri–Kansas City

Predicting CBT Response in Social Anxiety Disorder Using Functional Magnetic Resonance Imaging, Stefan G. Hofmann, PhD, Boston University

Neural Response During Attentional Control and Emotion Processing Predicts Improvement After Cognitive-Behavioral Therapy in Generalized Social Anxiety Disorder, Heide Klumpp, PhD, University of Illinois at Chicago

Neural Substrates of the Dot-Probe Task as Moderators of Response to CBT: An fMRI Study in Anxious Youth, Rebecca Price, PhD, University of Pittsburgh

Neural Processing in Panic Disorder and the Early Effects of Cognitive-Behaviour Therapy, Andrea Reinecke, PhD, University of Oxford

Discussant: K. Luan Phan, MD, University of Illinois at Chicago

333R—Using Multiple Levels of Analysis to Develop a More Fine-Grained Understanding of Depression Risk: Animal Models, Genetic Influences, Physiology, and Environmental Context

(Purdue/Wisconsin—6th floor)

Intermediate

Chair: Brandon Gibb, PhD, Binghamton University

Early Life Stress, Cytokines, and Depression, Anastacia Kudinova, MS, Binghamton University

Physiological and Genetic Mechanisms Underlying Brooding Rumination in Women at Risk for Depression, Mary Woody, MS, Binghamton University

Neural Markers of Emotional Reactivity in Children of Depressed Mothers, Katie Burkhouse, MS, Binghamton University

Eye-Tracking Indices of Attentional Bias in Children of Depressed Mothers: Polygenic Influences Help to Clarify Previous Mixed Findings, Max Owens, PhD, Binghamton University

Discussant: Brandon Gibb, PhD, Binghamton University

371R—Hoarding and Family Relationships

(Indiana/Iowa—6th floor)

Intermediate

Chair: Amy Przeworski, PhD, Case Western Reserve University

Hoarding, Relationship Functioning, and Functional Impairment: The Mediating Role of Family Accommodation, Valerie Vorstenbosch, MA, Ryerson University

An Examination of the Impact of Hoarding on Parent-Offspring Relationships and Family Functioning, Jennifer M. Park, MA, Massachusetts General Hospital

Interpersonal Problems and Hoarding From the Perspective of Adult Offspring of Individuals Who Hoard, Amy Przeworski, PhD, Case Western Reserve University

All in the Family: Hoarding Across the Generations, Gail Steketee, PhD, Boston University

Discussant: Kiara Timpano, PhD, University of Miami

383R—Novel Treatments and the Use of Biomarkers in Depression

(Los Angeles/Miami—5th floor)

Advanced

Chair: Madhukar Trivedi, MD, University of Texas Southwestern Medical Center

The Establishing Moderators and Biosignatures of Antidepressant Response for Clinical Care (EMBARC) Study: Reliability Data From Healthy Controls, Madhukar Trivedi, MD, University of Texas Southwestern Medical Center

Recent Developments in the Psychopharmacology of Depression, Maurizio Fava, MD, Massachusetts General Hospital

Corticostriatal Abnormalities Predict Symptom Change in Major Depression, Diego Pizzagalli, PhD, McLean Hospital/Harvard Medical School

ADAA at a Glance

- 3,000,000** Monthly visitors to ADAA.org
- 1,775** Participants listened to free public education webinars hosted by ADAA
- 259** Award winners since 1998, receiving more than \$1,003,000
- 15** Percent increase in conference attendance compared to 2013
- 4.2** Impact factor for *Depression and Anxiety*, ADAA's official journal; ranking 22/135 (psychiatry) and 8/114 (clinical psychology)

Taste of Things to Come

Watch for the debut in June of the new section on our website for professionals. In response to member requests, ADAA is redesigning and building out this section to include more resources for practice and research.

Next month ADAA will launch its new online Tech Reviews of mobile apps for anxiety and depression. Want to be a reviewer? Contact membership@adaa.org or the Technology Special Interest Group.

Partnerships are critical to achieving our mission. These are some of our recent collaborations:

- Active Minds
- American Brain Coalition
- American Foundation for Suicide Prevention
- Andrew Kukes Foundation for Social Anxiety
- HolaDoctor
- Mental Health Liaison Group
- National Eating Disorders Association
- NIMH Alliance for Research Progress
- NIMH Professional Coalition for Research
- PCORI (Patient-Centered Outcomes Research Institute)
- Partnership for Part D

Connect and Keep Up

You can connect with a special interest group (SIG) — Child and Adolescent Anxiety Disorders, Early Career Professionals and Students, Genetics and Neuroscience, Multicultural Advances, PTSD, Technology — or a committee — Awards, Membership, Public Education — during this conference.

- Get involved: Find out when these groups are meeting on page 7.

Keep up with latest news through *Anxiety and Depression Insights*, ADAA's new free e-news brief. ADAA members receive it automatically along with 5,486 subscribers.

Thank you for choosing to be here. ADAA's strength is its complexity and multidisciplinary approach to anxiety disorders, OCD, PTSD, and depression. At its core is the organization's commitment to engage professionals at all levels from diverse disciplines spanning practice and research and increase public education about these disorders to help patients find treatment and end stigma. Together, we will continue to be the leader in the field.

ADAA Champions

Members are our best ambassadors. And ADAA has its champions — those who make time to volunteer, reach out, and take on special initiatives. Members of the Board of Directors are champions. Committee members are champions. Members who make time to review submissions and award applications are champions. ADAA is made better by all of their actions.

We want to introduce you to a few ADAA champions.

It may have been destiny for the paths of ADAA and **Jerrold Rosenbaum, MD**, to become intertwined. On his first psychiatry clerkship in 1971, he presented a patient with “phobic anxiety depersonalization syndrome.” His practice and research led him to focus on anxiety and mood disorders. Jerry has been an active part of the ADAA community since the early 1980s. He has been the chair of the annual conference (1998), the Scientific Research Symposium (2003), and the Scientific Council (2004–2005). Serving on the Board of Directors, Jerry became ADAA’s fourth president in 2011, during a time of significant change following the death of Jerilyn Ross, the ADAA co-founder and president for 25 years. Jerry continues to contribute his time and energy to create a vibrant organization that is home to clinicians and researchers and helps millions of patients and their families find treatment.

Champions are a force for good. **Carmela Alcantara, PhD**, and **Sarah Hayes-Skelton, PhD**, work as team to create a home for those interested in multicultural issues in practice, research, and career. They are the co-chairs of the Multicultural Special Interest Group. Both got involved with ADAA as graduate students, and they have patiently worked behind the scenes to encourage more individuals to get involved.

Neal Sideman is the co-chair of the Public Education Committee. He has been involved with ADAA for more than 15 years. Neal achieved his own full recovery and cure from panic disorder and agoraphobia in 1998. He assists with the ADAA monthly free public education webinars, which are archived on the ADAA website. He is a champion for outreach and education.

WANTED: Used Electronic Devices

Help ADAA and get rid of your old smartphones, Blackberrys, Nooks, iPods, Kindles, and other electronics.

We have partnered with Revivn, a company that recycles smartphones (iPhones, Samsung, LG, Android), Blackberrys, e-readers, iPods, iPads, and other electronic devices whether they are broken or in working order.

Revivn will pay ADAA for each device, and the funds will support our professional and public education activities.

Find more details at revivn.com/adaa

Here's what to do:

Drop your old and used smartphones, Blackberrys, Kindles, Nooks, iPods, iPads, and other electronic devices to the Registration desk on the 5th floor.

OR

Send your electronic devices to ADAA, 8701 Georgia Ave., #412, Silver Spring, MD 20910

Revivn wipes clean all stored information, guaranteeing your privacy. You will receive a receipt for your donation.

Saturday, March 29

The Depression and Anxiety Specialty Clinic of Chicago was founded in 2005 by Rodney J. Benson, PhD, after it became apparent that there was a significant shortage of quality cognitive-behavioral therapy (CBT) available in Chicago. Many people with treatable disorders, such as obsessive-compulsive disorder (OCD), posttraumatic stress disorder (PTSD), social phobia, and major depressive disorder were suffering needlessly because they could not access quality care. It has been the mission of DASC to address this shortage by providing services to those suffering and also offering training opportunities to other professionals to increase the availability of CBT. DASC has clinical staff who are experts in using and teaching CBT.

Continuing Education

OVERVIEW

The conference aims to leverage its broad audience to synthesize cutting-edge knowledge, accelerate dissemination, and translate scientific evidence to practice by engaging clinicians.

The ADAA Annual Conference is novel and actively works to advance knowledge in unique ways:

1) fostering dissemination and collaboration among basic and behavioral researchers; 2) encouraging researchers and clinicians to discuss practical applications in real-life settings; 3) accelerating translation of research to practice with hands-on training of empirically tested treatments; 4) involving early career investigators, students, and trainees in research and learning; and 5) providing opportunities for professionals to hear patient perspectives. The conference engages all of these audiences, building bridges and supporting these networks throughout the year.

STATEMENT OF NEED

The annual conference of the Anxiety and Depression Association of America (ADAA) is designed to meet the educational needs of clinicians and researchers by providing training, dissemination of evidence-based treatments, and translation of the latest research.

Anxiety disorders and depression are common and disabling. Anxiety disorders comprise a diagnostic category that includes generalized anxiety disorder, panic disorder, social anxiety disorder, separation anxiety, selective mutism, and phobias. Lifetime prevalence estimates for all anxiety disorders and major depression are 28.8 percent and 16.6 percent, respectively. In *DSM-5*, obsessive-compulsive disorder (OCD) and posttraumatic stress disorder (PTSD) are closely related disorders that have been removed from the anxiety disorders category and into independent categories. Mental illnesses account for more than half as many disability days as all physical illnesses, with anxiety and depressive disorders being the major causes of disability. More than 40 million adults have one or more anxiety disorder, and 19 million adults have depression; anxiety disorders are the most common mental illnesses in children.

Research has long documented the high comorbidity between anxiety disorders and depression; the latest data continues to highlight the importance of understanding the overlap between these disorders, not only with respect to their etiology, but also in terms of treatment course. In 50 percent of diagnoses, individuals have comorbid anxiety and depression. Additionally, anxiety and depression are the primary illnesses associated with suicide.

Capitalizing on emerging science on mediators, biomarkers, and moderators of response to intervention, the theme of this

conference is personalized interventions for anxiety and depression. There are now well more than 400 empirically supported treatments and drugs for anxiety and depression. Thus, a new challenge is determining what interventions work for whom, when, and under what circumstances.

The desired results for the conference are that attendees are aware of the latest developments in preclinical and clinical research, are able to translate this knowledge to clinical practice, apply evidence-based research to practice, discuss real-world clinical experiences to influence research, and develop new skills and techniques to improve diagnosis, prevention, and treatment of anxiety disorders, depression, and comorbid disorders. It is also expected that researchers and clinicians will discuss how specific diagnoses manifest in the clinic and the reality of implementing evidence-based and novel treatments in real-world settings. Additionally, participants will evaluate and discuss how to use new technologies and social media in research and clinical practice, thus advancing the dissemination and implementation of empirically based and novel treatments.

Conference Educational Objectives

After participating in the 2014 annual conference, attendees should be able to

- Recognize and assess current and new diagnostic and therapeutic options for children and adults with anxiety disorders, OCD, PTSD, depression, and comorbid conditions.
- Apply evidence-based research, including the integration of treatment matching technologies to improve patient outcomes.
- Identify the etiology, pathophysiology, and neural pathways of anxiety and depressive disorders.
- Apply psycho- and pharmacotherapy interventions alone and in combination to develop treatment plans, predict treatment response, optimize remission, and prevent relapse.
- Discuss and innovate research on anxiety disorders, OCD, PTSD, depression, and comorbid disorders.
- Evaluate the impact of a multidisciplinary approach to the treatment and management of children and adults and use psychosocial and pharmacological treatments as applicable to improve patient outcomes.
- Design effective treatment plans for patients with refractory disorders and help family members of those who refuse treatment.

CE and CME credits are available to registered professional physicians, psychologists, social workers, counselors, therapists and nurses. **Members do not pay an additional fee;** nonmembers can receive credits for an additional fee of \$55 per discipline. Only professional attendees can receive CE or CME credits; those paying guest, student, or consumer fees cannot apply for CE or CME credits. Attendance verification forms and online evaluations must be completed by **May 15, 2014**, to be eligible for credit.

CE CREDITS

CE Credits are available for professionals through these organizations:

Psychologists: ADAA is approved by the American Psychological Association to sponsor continuing education credits for psychologists. ADAA maintains responsibility for this program and its content. CE credits for psychologists are granted on a 1 credit per contract basis.

Social Workers: This program is approved by the National Association of Social Workers (**Approval #886437837-2327**) for social work continuing education contact hours.

Counselors: This program is approved by the National Board for Certified Counselors (**Approval Number: SP-2302**) for continuing education credits.

Physicians' assistants and nurse practitioners: *AMA PRA Category 1 Credit™* can only be awarded to MDs or DOs (or physicians with equivalent degrees from other countries). Non-physicians may not be awarded *AMA PRA Category 1 Credit™*. Non-physicians may, however, receive a certificate of attendance/participation that acknowledges the activity was designated for *AMA PRA Category 1 Credit™* in order to apply their participation toward re-licensure.

HOW TO APPLY FOR CE CREDITS

1. Pick up a continuing education attendance verification form during posted registration hours. To receive credits, you must complete the form and mark each session you attend. This will determine how many credits you are eligible to receive.
2. Return the completed form to Registration by Sunday, 2:00 pm. You will receive a signed copy as your receipt. *IMPORTANT: If you forget to hand in the form, mail the attendance verification form **after** the conference to ADAA by **May 15, 2014**, or no credit will be given. No exceptions.*
3. All CE applicants will receive a conference evaluation form via e-mail. You must complete the online evaluation by **May 15** to receive CE credits.

Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Blackwell Futura Media Services and Anxiety and Depression Association of America (ADAA). Blackwell Futura Media Services is accredited by the ACCME to provide continuing medical education for physicians.

Designation

Blackwell Futura Media Services designates this live activity for a maximum of 29.5 *AMA PRA Category 1 Credits™*. Physicians

should only claim credit commensurate with the extent of their participation in the activity. Blackwell Futura Media Services and ADAA present this activity for educational purposes only and do not endorse any product, content of presentation, or exhibit. Participants are expected to utilize their own expertise and judgment while engaged in the practice of medicine. The content of the presentations is provided solely by presenters who have been selected because of their recognized expertise.

Faculty Disclosure

It is the policy of Blackwell Futura Media Service to plan and implement all of its educational activities in accordance with the ACCME's Essential Areas and Policies to ensure balance, independence, objectivity, and scientific rigor. In accordance with the ACCME's Standards for Commercial Support, everyone who is in a position to control the content of an educational activity certified for *AMA PRA Category 1 Credit™* is required to disclose all financial relationships with any commercial interests within the past 12 months that creates a real or apparent conflict of interest. Individuals who do not disclose are disqualified from participating in a CME activity. Individuals with potential for influence or control of CME content include planners and planning committee members, authors, teachers, educational activity directors, educational partners, and others who participate, e.g., facilitators and moderators. This disclosure pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. Any real or apparent conflicts of interest related to the content of the presentations must be resolved prior to the educational activity. Disclosure of off-label, experimental, or investigational use of drugs or devices must also be made known to the audience.

HOW TO APPLY FOR CME CREDITS

1. You will receive an e-mail prior to your arrival at the conference with a customized login for all session evaluations. If you registered on-site, you will receive the email during the week following the conference. You will briefly evaluate the sessions you attended, complete an overall conference evaluation, and your official certificate will be available for you to download immediately.
2. Pick up a continuing education attendance verification form during posted registration hours. Use this form to keep track of each session you attend and answer the two questions for each session. This will assist you in the online evaluation process. You do not need to return this form to ADAA; keep it for your records.
3. Complete the online evaluation via the customized e-mail and download your CME certificate. All steps above must be completed by **May 15, 2014**. No exceptions.

Direct all questions regarding CE or CME to conference@adaa.org, or call 240-485-1032.
