Guided Poster Tours

Posters Session I

Friday, April 1
6:00 – 7:30 pm

A Tour of the Latest Advances in OCD
Guide: Sabine Wilhelm, PhD, Massachusetts General Hospital

S1-7: Sensorimotor Gating Across Three Disorders: Deficits Only in Females with Obsessive-Compulsive Disorder
Shari Steinman, PhD, New York State Psychiatric Institute

S1-117: Fear Conditioning and Extinction in Youth with Obsessive Compulsive Disorder
Joseph McGuire, PhD, Semel Institute for Neuroscience and Human Behavior at UCLA

S1-122: Deep Transcranial Magnetic Stimulation of the Anterior Cingulate Cortex in Obsessive-Compulsive Disorder Patients
Aron Tendler, MD,Brainsway

S1-116: Can Exposure-Based CBT Extend IV Ketamine’s Effects in Obsessive-Compulsive Disorder? An Open-Label Trial
Carolyn Rodriguez, MD, PhD, Stanford University

S1-121: Effect of Ordering and Hoarding on a Perseverative Task in Pediatric Obsessive-Compulsive Disorder
Sophia Song, GED, Johns Hopkins University

S1-114: Baseline Characteristics of the Multi-Center Clinical Trial of Deep Brain Stimulation for Severe, Intractable Obsessive-Compulsive Disorder
Lynn Hana, BS, Butler Hospital

A Tour of Threat and Fear — Providing Insight Into Anxiety
Guide: Kerry Ressler, MD, PhD, McLean Hospital

S1-145: Prospective Study of Conditioned Fear and Extinction Learning Performance as a Risk Factor for PTSD in Active Duty Marines
Dean Acheson, PhD, University of California San Diego Department of Psychiatry
S1-1: Integrative Systems Approach Identifies Blood Glucocorticoid Receptor Related Immune Pathways Associated with PTSD Diagnosis and Treatment Response
Nikolaos Daskalakis, MD, PhD, Icahn School of Medicine at Mount Sinai

S1-45: Neural Correlates of Fear Conditioning and Extinction Learning in Anxiety Disorders
Marie-France Marin, PhD, Massachusetts General Hospital / Harvard Medical School

Daniel Glenn, PhD, Center of Excellence for Stress and Mental Health, San Diego Veterans Affairs Health Services

S1-153: Facets of Emotion Regulation and Posttraumatic Stress: Indirect Effect of Peritraumatic Dissociation
Alyssa Jones, MA, University of Kentucky

S1-141: Mechanisms of Structural Plasticity Underlying Olfactory Fear Learning in Adult Mice
Filomene Morrison, MA, McLean Hospital, Harvard Medical School

S1-187: Structural and Functional Connectivity in Posttraumatic Stress Disorder: Associations with FKBP5
Negar Fani, PhD, Emory University

Poster Session II
Saturday, April 2
6:30 – 8:00 pm

A Brief Running of the Rows Exploring Extinction in PTSD and Anxiety Disorders
Guide: Barbara Rothbaum, PhD, Emory University

S2-123: D-Cycloserine Effects on Quality of Life in DCS vs PBO Augmented Responders to CBT in Panic Disorder
Elizabeth Lewis, BS Psychology, Rush University Medical Center

S2-140: The Relationship of Combat-PTSD to Prefrontal Cortex Activation During Approach Avoidance Conflict Decision-Making
Steven Green, PhD, Laureate Institute for Brain Research

S2-46: D-Cycloserine Enhances Generalization of Fear Extinction in Children
Simon Byrne, PhD, Macquarie University

S2-135: Human Pathway to Amygdala Inhibition and Disruption in PTSD
Desmond Oathes, PhD, The University of Pennsylvania Perelman School of Medicine
Thinking Outside the Box: Transdiagnostic Risk Factors and Mechanisms
*Guide: Jordan Smoller, MD, ScD, Massachusetts General Hospital*

S2-74: The Role of Attachment and Childhood Trauma in Depression and PTSD
*Thomas Crow, MA, Penn State University*

S2-66: Testing Biases in the Categorization and Interpretation of Threat from Transdiagnostic and Neuropsychological Perspectives
*Ashley Howell, MS, Ohio University*

S2-3: The Network Structure of 12-Month DSM-IV Disorders: An Application of Network Analysis on the Collaborative Psychiatric Epidemiology Surveys
*Hanjoo Kim, MA, Penn State University*

S2-16: Effect of Cognitive-Behavioral Therapy on Brain and Clinical Outcomes Based on Pretreatment Amygdala Response to Negative Faces in Anxiety and Depression
*Heide Klumpp, PhD, University of Illinois*

S2-120: Common and Unique Neural Circuit Disruptions in Cognitive and Emotional Functioning Across Psychiatric Disorders
*Benjamin Rosenberg, BA, University of Pennsylvania School of Medicine*

S2-124: Does Cigarette Smoking Increase Risk for Panic? A Mendelian Randomization Study
*Jeanne Savage, BA, Virginia Commonwealth University*
