ANXIETY DISORDERS ASSOCIATION OF AMERICA HIGHLIGHTS: 2008

Everyone is concerned with numbers these days.
Take a look at some of our highlights from last year:

126 MILLION Number of people reached through ADAA public relations efforts about anxiety disorders and their treatment

13 MILLION Listeners who heard how to treat OCD through ADAA radio public service announcements

5 MILLION Hits each month to the ADAA main website (www.adaa.org)

987,000 Dollars distributed to 152 recipients in ADAA's Award Program since 1999

24,000 Number of Treat OCD Resource Kits distributed to primary care physicians

10,000 Number of Got Anxiety? brochures distributed to college campuses and through students for National Stress Out Day in partnership with Active Minds

1,311 Number of ADAA professional members

Dear Colleagues,

Welcome to New Mexico for the 29th Annual Conference of the Anxiety Disorders Association of America (ADAA). Whether this is your first ADAA Conference or your 29th, we sincerely appreciate your participation and trust that

ADAA provides you an outstanding educational and collegial experience.

Many thanks to Dr. Risa Weisberg, the Conference chair, and to the members of the Conference Committee, who have volunteered many hours over the past year to plan and prepare this outstanding program. In the spirit of translating science and fostering collaboration, this year's theme, *Anxiety and Health: Translating Research Into Practice*, brings together the best in basic science, clinical research, and clinical practices. With twice as many submissions as usual, the reviewers once again selected the sessions of highest quality to present to you. Thanks to all the reviewers and presenters for making this an excellent, valued program.

This Conference is for you—researchers and clinicians, established professionals and students, long-time attendees, and first-timers. I hope you will take advantage of the many opportunities throughout the Conference to meet new colleagues and learn more about the ADAA community. The evening activities—S'mores Night on Friday and the Georgia O'Keeffe Museum on Saturday—lend themselves to casual conversations and to making the most of the extraordinary surroundings.

Our diverse and varied membership is our strength. We share a common purpose: to make the future better for children, adolescents, and adults with or at risk for anxiety disorders. We invite you to become involved in our shared vision.

Enjoy the meeting and the beautiful scenery!

Jerilyn Ross, MA, LICSW
President and CEO
Anxiety Disorders Association of America

WELCOME FROM THE ANNUAL CONFERENCE CHAIR

It is my pleasure to welcome you to the 2009 ADAA Annual Conference. We received the largest submission of papers in ADAA history, providing a rich, diverse, and high-quality program.

Highlights this year include the keynote address by Richard Lane, MD, PhD, on the neuroscience of emotion. Plenary sessions will feature cultural considerations in the understanding and treatment of anxiety disorders (Friday) and suicidality and comorbid anxiety (Saturday). Other highlights include presentations on the findings of the CAMS (treatment in children) and the CALM (treatment in primary care) studies and sessions on mindfulness-based methods and motivational interviewing. Of particular interest to researchers working in the current economic climate is a session Friday afternoon on future directions and funding for anxiety disorders research. In addition to the symposia, workshops, and oral presentations, there are nearly 200 posters to review at the New Research Poster Session and Case Presentations on Friday.

We have modified our usual conference program this year, and I hope these changes further enrich your conference experience. The Scientific Research Symposium, formerly invitation-only, is now open to all conference attendees on Friday. The panel will discuss the latest discoveries and advances in research on the

genetics of anxiety disorders. To allow more time for networking, there will be no formal presentations during lunch. In step with this year's theme, *Anxiety and Health: Translating Research Into Practice*, we are offering sessions on what therapists need to know about fibromyalgia, chronic fatigue, IBS, neurological disorders, and other comorbid medical conditions.

I am particularly happy to welcome first-time attendees, especially those of you new to ADAA. You will find opportunities during breakfast and lunch to meet and network with colleagues who have similar interests. Please gather on the patio outside the ballroom on Friday, 8:30 p.m., to sit around a campfire, eat s'mores, and talk. Join me and the Conference Committee in making our new colleagues feel at home in ADAA.

My sincerest gratitude to my colleagues on the Conference Committee for their time and hard work to make this exciting program a reality. And certainly this meeting never would have come together without the truly stellar ADAA staff. Take a minute to meet them; they are there all year to answer your questions.

I hope you enjoy the meeting, learn a lot, share what you know, network, and have fun.

Risa Weisberg, PhD, Brown University

ADAA AWARDS PROGRAM

2009 Career Development Travel Award Winners

ADAA cultivates the next generation of experts in anxiety disorders by supporting basic and clinical research into the causes, treatments, and cures for anxiety disorders. These awards encourage early career professionals to pursue research careers by supporting the presentation of their research at the ADAA Annual Conference and either the annual meetings of the Association for the Advancement of Behavioral and Cognitive Therapies or the American College of Neuropsychopharmacology.

STATEMENT OF NEED

The theme, *Anxiety and Health: Translating Research Into Practice*, is timely. As a growing body of research demonstrates links between anxiety disorders and other mental and physical health issues, diagnosing and treating patients with anxiety disorders holds an increasingly important role in overall wellness. With more than 40 million adult Americans estimated to have at least one anxiety disorder, these disorders impact society economically by affecting job performance, employer challenges, and overall health care costs. Being able to recognize comorbid mental and physical disorders and finding ways to effectively and efficiently diagnose and treat these disorders will lead to better health care system outcomes in general, as well as individual patient care.

LEARNING OBJECTIVES

After attending the conference, participants should be better able to:

- Discuss the latest research in the diagnosis and treatment of anxiety disorders with colleagues.
- Recognize evidence-based pharmaceutical and psychosocial options for treating patients.
- Evaluate the novel therapies emerging as treatments for anxiety disorders.
- Critically evaluate and discuss the controversies in patient diagnosis and treatment.
- Identify comorbid mental and physical disorders that may impact patient anxiety.
- Explore the differential diagnoses of anxiety disorders with respect to gender differences, age, and comorbidity.

CONTINUING EDUCATION

ADAA is pleased to offer CE and CME credits to registered professional physicians, psychologists, social workers, and counselors. The credits are available for an additional fee of \$45 per discipline.

You can pick up a continuing education form at Registration. To receive credits, you must complete the 8.5 x 14-inch form and mark each session you attend. This will determine how many credits you are eligible to receive. Return the completed form to Registration by Sunday at noon. You will receive a signed copy as your receipt.

A conference evaluation will be sent to you by e-mail after the conference. Please complete and return it to ADAA. In accordance with new rules for continuing education and in an effort to go green, we will not have paper evaluations for individual sessions.

If you have not paid for CE/CME credits, you can do so during the meeting at Registration. We appreciate your understanding that CE/CME credits will only be processed once payment has been received. All payments and evaluations must be received by April 30, 2009.

CME CREDITS

Participants are expected to utilize their own expertise and judgment while engaged in the practice of medicine. The content of the presentations is provided solely by presenters who have been selected because of their recognized expertise.

Disclosure It is the policy of the Center for Continuing Education at Tulane University Health Sciences Center and ADAA to plan and implement all of its educational activities in accordance with the ACCME's Essential Areas and Policies to ensure balance, independence, objectivity, and scientific rigor. In accordance with the ACCME 2004 Standards for Commercial Support, everyone who is in a position to control the content of an educational activity certified for AMA PRA Category 1 Credit[®] is required to disclose all relevant financial relationships with any commercial interests within the past 12 months that creates a real or apparent conflict of interest. Individuals who do not disclose are disqualified from participating in a CME activity. Individuals with potential for influence or control of CME content include planners and planning committee members, authors, teachers, educational activity directors, educational partners, and others who participate, e.g. facilitators and moderators. This disclosure pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. Any real or apparent conflicts of interest related to the content of the presentations must be resolved prior to the educational activity. Disclosure of off-label, experimental or investigational use of drugs or devices must also be made known to the audience.

CE CREDITS

Psychologists: ADAA is approved by the American Psychological Association to sponsor up to 27 continuing education credits for psychologists. ADAA maintains responsibility for this program and its content. CE credits for psychologists are granted on a 1 credit per contract basis.
